

Reporting Period: December 23, 2025, to January 24, 2026

Note: Missing dates normally mean that the wind contributed to boats not going out to fish.

I have a NEW email, if you can send me any fishing news or pictures: lyncurt0@gmail.com

I am presently in southeast Arizona watching rain and clouds as a subtropical storm passes over. I sure hope Kino is getting some rain, but I would rather be back in Kino catching some fish.

Jack Basey has been supplying updates on things down there, so if you have anything to pass on, please contact him.
